Dhyey Consulting's industry specific apps for Microsoft Dynamics

Solve challenges with apps tailored for a wide range of industries and business needs—and begin propelling innovation and productivity today.

Quality Control Management

Quality control addon provides functionality ensures that incoming materials and finished products are as per standard and consistent thru Various stages like, Batch / Lot inspection, Sampling, Validation of results, Test certificate and release the item / product, move rejected items to different location, restrict consumption and selling of items which are under inspection or failed.

Maintenance Management

A Computerized maintenance management system (CMMS) / Enterprise Asset Management Software (EAM) /Tool Maintenance system helps asset-intensive organizations to digitally plan, track, measure, and optimize all maintenance activities. It also logs maintenance and repair records, locates the parts and resources required, tracks associated costs, and manages related workflows.

EXIM (Export-Import Management)

Comprehensive suite of features tailored to streamline EXIM operations for industries such as License / Scheme Management / Export Incentive Management: Maximize profitability by effortlessly tracking and managing export incentives. Export Documentation: Seamlessly handle export documentation processes to ensure accuracy and compliance. Bill of Entry: Maintain visibility and control over goods in transit while efficiently managing bill of entry processes.

Engineering Change Note (ECN)

Engineering change management provides structure and discipline to the product data management process, which allows products to be defined, released, and revised under control. It enables you to plan and manage product versioning and engineering changes.

ABC Analysis

ABC inventory analysis is a commonly used strategy to categorize inventory into "A", "B", and "C" classifications based on the Pareto Principle that 80% of sales, cost, inventory value or profit can be attributed to 20% of the products in inventory.

Customer / Vendor Portal

Portal is required for the organizations to connect and collaborate with their customers & Vendors digitally to exchange information to reduce interaction and build transparency.

Back-order management

Back Order management add on helps to manage Sales and Purchase back orders. You can identify, track, and analyse the orders that are not shipped, or material not received on-time.

Gate Pass (RGP - NRGP)

In large organizations, lot of movements take place every day. It may be movement of raw materials for subcontract production, loan, tools and fixtures, consumable items etc.

We have industry specific apps (Process Industries – Advanced Quality Control Management, Maintenance Management, Vendor Portal) + (Discrete Industries – Engineering Change Note, ABC Analysis, Customer Portal, Back-order Management, Gate Pass)

Dhyey Consulting's industry specific apps for Microsoft Dynamics (continued)

Indent Management

Indent Management System (IMS) addon is a complete solution in Dynamics 365 Business Central procurement process. By indent, Procurement department analyses theneed of items / services, refer purchase and consumptionhistory, plan procurement and estimating the cost.

Audit Trail

An audit trail is proof of all the changes made to financialdata. It's a list that displays the count and history of a document, from creation, modification to posting.

NC (Non-Conformance)

Non-conformance means that something is wrong in a process, procedure, product, goods supplied from a vendor, complain from customer, lack of collaboration between departments or in a Management System. It results in a degraded performance and quality of productand brand values of organization.

Loyalty Management

Our app is a comprehensive solution designed to streamline your sales processes and enhance customerloyalty.

Interaction Notification

Send Notification message to contact through WhatsApp,SMS, or Email. Document report attachment with WhatsApp notification if setup is enabled.

Lorry Receipt

LR management addon is a complete solution to update Lorry receipt details in posted sales invoice. Normally LR detail received from transporter after E- way bill process. Posted sales invoice is not editable bydefault. This feature auto updates multiple sales invoices for customer and location.

E-invoice

GST e-invoice is the starter of the digital invoice forgoods and services provided by the business firm generated at the government GST portal. The idea ofGST e-invoice generation system has been taken intoconsideration for the reduction in GST evasion.

Multisource Procurement

Diversification of the supply network helps businessesbe agile and respond to changes. One of the most common ways to diversify is to divide the supply of aspecific product among different vendors by assigninga supply percentage to each of them.

Cash Discount

Cash discounts refer to an incentive that a seller offersto a buyer in return for paying an invoice before the scheduled due date. In a cash discount, the seller will usually reduce the amount that the buyer owes by a small percentage.
